📍 Samarinda, Kalimantan timur

PROFILE

Bachelor of Computer Science, Information Systems Program, Universitas Mulawarman with GPA 3.88/4.00. Passionate about Data Analysis, Business Intelligence, and data-driven decision-making. Experienced in data analysis, database management, data visualization, and developing data-based solutions through internships, independent studies, and academic projects. Skilled in Python, SQL, Microsoft Excel, Tableau, and Looker Studio, with strong analytical, problem-solving, and communication abilities.

EXPERIENCE

Chief Coordinator of Laboratory Assistants 08/2024 – 06/2025
Mulawarman University

- Led and coordinated a team of laboratory assistants to support practical sessions.
- Organized assistant schedules and managed laboratory operations during academic semesters.
- Maintained communication with lecturers regarding practical implementation.
- Guided and supported the skill development of laboratory assistants.
- Resolved operational and technical issues during practical activities.
- Improved team coordination and workflow efficiency.

General Staff 02/2025 – 04/2025
Civil Service and Human Resource Development Agency (BKPSDM) Samarinda City

- Performed data entry, validation, and management using Microsoft Excel to support administrative activities.
- Prepared, managed, and archived administrative documents systematically.
- Contributed to the development of a web-based room reservation system (SIPARUNG).
- Assisted in user interface (UI) development and conducted application feature testing.
- Collaborated with the team to support system implementation.

EDUCATION

Mulawarman University – Bachelor of Computer Science 08/2022 - 07/2026

- GPA 3.88/4.00
- Chief Coordinator of Laboratory Assistants, Information Systems Program
- Laboratory Assistant (Data Visualization, Statistics, Database Systems, Computer Networks)
- Independent Study: Data Analyst – Bitlabs Academy
- Public Relations Staff, INFORSA
- Chess Athlete, East Kalimantan – POMNAS 2023 & 2026

CERTIFICATION

Data Analytics for Business 08/2024 – 12/2024
Bitlabs Academy

- Gained practical knowledge of data analysis using Microsoft Excel, SQL, Python, and Tableau.
- Conducted data cleaning, visualization, and analysis to generate business insights.
- Completed case-based data analysis projects.
- Developed project management and problem-solving skills.

SKILLS

Tableau	Microsoft Excel
Data Visualization	SQL
Data Analysis	Python
Data Validation	Attention to Detail

LANGUAGE

English	Professional Working Proficiency
Indonesian	Native

PROJECTS

Business Process Analysis and Sales Route Optimization

Trading Company

- Analyzed over 60,000 transaction, sales visit, and customer records using Python, SQL, and Tableau.
- Conducted data cleaning, feature engineering, and customer segmentation using K-Means Clustering (RFM Analysis).
- Optimized sales visit routes using the Traveling Salesman Problem (TSP) algorithm to improve operational efficiency.
- Built dashboards and business recommendations based on data analysis to support decision-making.

Customer Segmentation Analysis Using Machine Learning

Independent Project

- Analyzed customer data to identify patterns and segmentation for business strategy development.
- Performed data preprocessing including cleaning, exploratory data analysis (EDA), feature engineering, encoding, and transformation.
- Built segmentation models using K-Means and Hierarchical Clustering, determining optimal cluster numbers.
- Evaluated and compared model performance using clustering evaluation metrics to produce representative customer segmentation.

Brain Tumor Classification Using Deep Learning

Independent Project

- Developed a brain tumor classification model using Deep Learning with VGG16 architecture on MRI images.
- Conducted image preprocessing including CLAHE, normalization, data augmentation, and resizing to improve training quality.
- Compared classification performance with and without Region of Interest (ROI) segmentation using U-Net.
- Evaluated model performance using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.
